

Need a transponder? Get the class leader....

At Trig we refer to the TT31 as the 'class leader.'

Quite a claim, so we thought we should prove it!

This information sheet provides compelling reasons to choose the TT31, it delivers the best performance and value.

TT31 - Ticking all the boxes

You'll probably already know that the TT31 is the easiest retrofit transponder. Keeping the existing a/c transponder antenna, wiring and original tray is a great starting point. However, the table below shows how the TT31 scores on all points; with superior installation options, features, third party avionics compatibility and warranty provision.

If you require our free FAA STC's (for ADS-B) then these approvals cover hundreds of aircraft types to make ADS-B even easier.

Transponder Comparison Chart	TT31	GTX 328	GTX 330	GTX 330ES	KT74	AXP340
Mode S - extended squitter	✓	✗	upgrade	✓	✓	✓
ADS-B Out capable (1090 MHz)	✓	✗	\$1200	✓	✓	✓
Plug and Play for KT76A, KT76C, KT78A	✓	✗	✗	✗	✓	✓
Retro-fit ADS-B use original tray	✓	✗	✗	✗	✓	✗
Configurable serial ports - for the most flexible install	✓	✗	✓	✓	✗	✗
Supports TIS A Traffic (USA)	✓	✗	✓	✓	✓	✗
ADS-B compatibility with Garmin GNS/GTN navigators	✓	✗	✗	✓	✓	✓
ADS-B compatibility with FreeFlight 1201 and NexNav Mini WAAS GPS units	✓	✗	✗	✗	✓	✓
Two year warranty from date of install (not date of purchase)	✓	✗	✗	✗	✗	✗
Fixed price out of warranty costs	✓	✓	✓	✓	✓	✓
List price U.S. dollars (ex tax).	\$ 2925	\$ 2995	\$ 3495	\$ 3995	\$ 3499	\$ 3995

Right now is a great time to buy ahead of 2016.

Trig ticks all the boxes, **order now** and fit the 'class leader'.
